Leveraged & Inverse ETFs

## Direxion Daily AMZN Bull 2X and Bear 1X ETFs

## Overview

The Direxion Daily AMZN Bull 2X ETF and Direxion Daily AMZN Bear 1X ETF seek daily investment results, before fees and expenses, of 200% and 100% of the inverse (or opposite), respectively, of the performance of the common shares of Amazon.com, Inc. (NASDAQ: AMZN).

**Investing in the funds involves a high degree of risk.** Unlike traditional ETFs, or even other leveraged and/or inverse ETFs, these leveraged and/or inverse single-stock ETFs track the price of a single stock rather than an index, eliminating the benefits of diversification. Leveraged and inverse ETFs pursue daily leveraged investment objectives, which means they are riskier than alternatives which do not use leverage. They seek daily goals and should not be expected to track the underlying stock's performance over periods longer than one day. They are not suitable for all investors and should be utilized only by investors who understand leverage risk and who actively manage their investments. The Funds will lose money if the underlying stock's performance is flat, and it is possible that the Bull Fund will lose money even if the underlying stock's performance increases, and the Bear Fund will lose money even if the underlying stock's performance decreases, over a period longer than a single day. **Investing in the Funds is not equivalent to investing directly in AMZN.**

## Single Stock Exposure

Amazon.com, Inc. engages in the retail sale of consumer products and subscriptions in North America and internationally. The company operates through three segments: North America, International, and Amazon Web Services. AMZN is registered under the Securities Exchange Act of 1934, as amended (the "Exchange Act"). Information provided to or filed with the Securities and Exchange Commission by Amazon.com, Inc. pursuant to the Exchange Act can be located by reference to the Securities and Exchange Commission file number 000-22513 through the Securities and Exchange Commission's website at www.sec.gov. In addition, information regarding Amazon.com, Inc. may be obtained from other sources including, but not limited to, press releases, newspaper articles and other publicly disseminated documents.

## Fund Facts

| | Direxion Daily AMZN Bull 2X ETF | Direxion Daily AMZN Bear 1X ETF |
|---|---|---|
| Fund Symbol | **AMZU** | **AMZD** |
| Intraday Indicative Value | **AMZU.IV** | **AMZD.IV** |
| CUSIP | **25461A858** | **25461A502** |
| Daily Target | **200%** | **-100%** |
| Gross Expense Ratio | **0.99%** | **1.26%** |
| Net Expense Ratio* | **0.99%** | **1.02%** |
| Inception Date | **09/07/2022** | **09/07/2022** |

**The Net Expense Ratio includes management fees, other operating expenses and Acquired Fund Fees and Expenses. If Acquired Fund Fees and Expenses were excluded, the Net Expense Ratio would be 0.86% for AMZU and 0.95% for AMZD. The Funds' adviser, Rafferty Asset Management, LLC ("Rafferty"), has entered into an Operating Expense Limitation Agreement with each Fund. Under the Operating Expense Limitation Agreement, Rafferty has contractually agreed to waive all or a portion of its management fee and/or reimburse a Fund for Other Expenses through September 1, 2027, to the extent that a Fund's Total Annual Fund Operating Expenses exceed 0.95% of the Fund's average daily net assets (excluding, as applicable, among other expenses, taxes, swap financing and related costs, acquired fund fees and expenses, dividends or interest on short positions, other interest expenses, brokerage commissions and extraordinary expenses). If these expenses were included, the expense ratio would be higher.*

**Important Information Regarding AMZU**

The Direxion Daily AMZN Bull 2X ETF (AMZU) seeks 200% daily leveraged investment results and thus will have an increase of volatility relative to the underlying AMZN performance itself. Longer holding periods, higher volatility of AMZN and leverage increase the impact of compounding on an investor's returns. During periods of higher AMZN volatility, the volatility of AMZN may affect the fund's performance.

**Important Information Regarding AMZD**

The Direxion Daily AMZN Bear 1X ETF (AMZD) seeks daily inverse investment results and is very different from most other exchange-traded funds. Longer holding periods and higher volatility of AMZN increase the impact of compounding on an investor's returns. During periods of higher volatility, the volatility of AMZN may affect the fund's return as much as, or more than, the return of AMZN.

## Performance (As of 09/30/2026)

| | | 1M % | 3M % | YTD % | 1Y % | 3Y % | 5Y % | 10Y % | S/I % | Inception |
|---|---|---|---|---|---|---|---|---|---|---|
| **AMZU** | NAV | -9.18 | 2.76 | -1.09 | 3.48 | 21.46 | - | - | 12.15 | 09/07/22 |

| **AMZD** | NAV | 4.33 | -6.93 | -11.58 | -16.85 | -22.73 | - | - | -19.34 | 09/07/22 |
| | Market Close | 4.22 | -6.88 | -11.57 | -16.84 | -22.74 | - | - | -19.38 | |

*The performance shown prior to April 2, 2024, reflects the Direxion Daily AMZN Bull 2X ETF's previous daily leveraged investment objective, before fees and expenses, of 150% of the performance of AMZN.*

*The performance data quoted represents past performance. Past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate. An investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance quoted. Returns for performance under one year are cumulative, not annualized. For the most recent month-end performance please visit the funds' website at direxion.com. Short-term performance, in particular, is not a good indication of a fund's future performance, and an investment should not be made based solely on returns. Because of ongoing market volatility, fund performance may be subject to substantial short-term changes. For additional information, see the fund's prospectus.*

## Important Information

***An investor should carefully consider a Fund's investment objective, risks, charges, and expenses before investing. A Fund's prospectus and summary prospectus contain this and other information about the Direxion Shares. To obtain a Fund's prospectus and summary prospectus call 866-476-7523 or visit our website at direxion.com. A Fund's prospectus and summary prospectus should be read carefully before investing.***

CUSIP Identifiers have been provided by CUSIP Global Services, managed on behalf of the American Bankers Association by Standard and Poor's Financial Services, LLC, and are not for use or dissemination in any manner that would serve as a substitute for a CUSIP service. The CUSIP Database, ©2011 American Bankers Association. "CUSIP" is a registered trademark of the American Bankers Association.

Shares of the Direxion Shares are bought and sold at market price (not NAV) and are not individually redeemed from a Fund. Market Price returns are based upon the midpoint of the bid/ask spread at 4:00 pm EST (when NAV is normally calculated) and do not represent the returns you would receive if you traded shares at other times. Brokerage commissions will reduce returns. Fund returns assume that dividends and capital gains distributions have been reinvested in the Fund at NAV. Some performance results reflect expense reimbursements or recoupments and fee waivers in effect during certain periods shown. Absent these reimbursements or recoupments and fee waivers, results would have been less favorable.

**Direxion Shares Risks** – An investment in a Fund involves risk, including the possible loss of principal. Each Fund is non-diversified and includes risks associated with a Fund concentrating its investments in a particular security, industry, sector, or geographic region which can result in increased volatility. A Fund's investments in derivatives such as futures contracts and swaps may pose risks in addition to, and greater than, those associated with directly investing in securities or other investments, including imperfect correlations with underlying investments or the Fund's other portfolio holdings, higher price volatility and lack of availability. As a result, the value of an investment in a Fund may change quickly and without warning.

**Leverage Risk** – The Bull Fund obtains investment exposure in excess of its net assets by utilizing leverage and may lose more money in market conditions that are adverse to its investment objective than a fund that does not utilize leverage. A total loss may occur in a single day. Leverage will also have the effect of magnifying any differences in the Fund's correlation with AMZN and may increase the volatility of the Bull Fund.

**Daily Correlation Risk -** A number of factors may affect the Bull Fund's ability to achieve a high degree of correlation with AMZN and therefore achieve its daily leveraged investment objective. The Bull Fund's exposure to AMZN is impacted by AMZN's movement. Because of this, it is unlikely that the Bull Fund will be perfectly exposed to AMZN at the end of each day. The possibility of the Bull Fund being materially over- or under-exposed to AMZN increases on days when AMZN is volatile near the close of the trading day.

**Daily Inverse Correlation Risk -** A number of factors may affect the Bear Fund's ability to achieve a high degree of inverse correlation with AMZN and therefore achieve its daily inverse investment objective. The Bear Fund's exposure to AMZN is impacted by AMZN's movement. Because of this, it is unlikely that the Bear Fund will be perfectly exposed to AMZN at the end of each day. The possibility of the Bear Fund being materially over- or under-exposed to AMZN increases on days when AMZN is volatile near the close of the trading day.

**Consumer Discretionary Sector Risk —** Companies in the consumer discretionary sector are tied closely to the performance of the overall domestic and international economy, including the functioning of the global supply chain, interest rates, competition and consumer confidence.

**Retail Industry Risk -** Retail and related industries can be significantly affected by the performance of the domestic and international economy, consumer confidence and spending, intense competition, changes in demographics, and changing consumer tastes and preferences.

**Amazon.com, Inc. Investing Risk —** Amazon.com, Inc. faces risks associated with intense competition across different industries, including physical, e-commerce omni channel retail, e-commerce services, web and infrastructure computing services, electronic devices, digital content, advertising, grocery, and transportation and logistics services; the expansion into new products, services, technologies and geographic regions; its international activities; the variability in the demand for its products and services; fraudulent and unlawful activities of sellers; intellectual property rights; among other risks.

Additional risks of each Fund include Effects of Compounding and Market Volatility Risk, Market Risk, Counterparty Risk, Rebalancing Risk, Intra-Day Investment Risk, Other Investment Companies (including ETFs Risk), Cash Transaction Risk, Passive Investment and Index Performance Risk and for the Direxion Daily AMZN Bear 1X ETF, Shorting or Inverse Risk. Please see the summary and full prospectuses for a more complete description of these and other risks of a Fund.
